## About us

C.S. HEALTHCARE is an ISO 9001 : 2015 Certified Pharmaceutical Company offering third party manufacturing and PCD pharma franchise opportunities for intensive care products in with various product range & good quality control are the strength of C.S. HEALTHCARE. Our product are Critical Care Antibiotic Injection, Critical Care Gastroenterology Injection, Critical Care Cardiology Injections, Antimalarial and Analgesics Injection which are manufactured under WHO-GMP facilities. At our manufacturing unit these injectables are used processed using modern processing techniques and best grade chemical compounds in compliance with defined medical industry standards. Our astute experts test these products against promiscuous quality parameters to ensure their high reliability.

**Our goals** is to be one of the most innovative, best performing and trusted health care company.

**Our values and expectations** are the heart of everything we do help define our culture- so that together we can deliver extraordinary things for consumers and make C. S. Healthcare brilliant place to work. Today we have grown as one of the leading Pharma Company & seamless service provider of India.

**Values:** our values are our core - our values and standards represent the very core of our character as a company.

Consumer's Satisfaction is our priority

We have vast critical care range.

We have quality product & Excellence range of product.

**Goals:** Our goal is discover, develop and provide innovative products and services that save and improve lives around us.

# PRODUCT RANGE

## CEFTAC-S 1.5

Ceftriaxone with Sulbactam for Injection

- Broad-Spectrum cephalosporin antibiotic
- Possesses wide spectrum activity against both Gram+ve & Gram-ve bacteria
- More active than Cefotaxime & Cefoperazone against Pseudomonas aeruginosa
- Extends the spectrum of Ceftriazone against beta lactamase strains.

## AMOSUM - 1.2

Amoxycillin and Potassium Clavulanate Injection I.P.

Amoxicillin and clavulanate potassium is used to treat many different infections caused by bacteria, such as, pneumonia, ear infections, bronchitis, urinary tract infections and infections of the skin.

## CS-PIME 1GM/CS-PIME-TZ CS-PIME-S 1.5

Cefepime Injection/Cefepime & Tazobactam Injection

- Empiric Therapy for Febrile Neutropenic Patients
- Uncomplicated and Complicated U.T.I. (including pyelonephritis).
- Uncomplicated Skin and Skin Structure Infections
- Complicated intra-abdominal Infections

## CefoNax - 1.5

Cefoperazone & Sulbactam for Injection

- Broad spectrum cephalosporin
- Effective against a wide range of aerobic and anaerobic gram-positive and gram-negative bacteria
- Achieves high penetration in most tissues
- Achieves high cure rates compared to Ampicillin/Tobramycin in biliary tract infections

# PRODUCT RANGE

## VANOX - 500mg / 1GM

### Vancomycin Hydrochloride for Injection IP

- An glycopeptide antibiotic
- Used in the prophylaxis & treatment of infection caused by gram (+)ve bacteria against staphylococci & enterococci.
- 100% Susceptible to B-lactams & macrolide resistant strains.

## AzeNox-500

### Azithromycin for Injection U.S.P.

Handles Resistant Infections with Ease

- Highly active against multiple organisms including Haemophilus influenzae, Mycoplasma pneumoniae, Streptococcus pneumoniae
- More stable than Erythromycin at gastric pH
- Possesses long half life leading to once daily dose convenience

## AzeTreo -500mg / 1gm

### Aztreonam for Injection USP

- Effective against aerobic gram-ve organism.
- Given IV eliminated via renal secretion
- Aztreonam is less immunogenic than penicillin and cephalosporins
- Aztreonam does not cross react with other beta-lactams.

## CS-TAZ

### Piperacillin & Tazobactam for Injection I.P.

- Urinary Tract infections
- Surgical Infections
- Uncomplicated skin and skin structure infectious
- Complicated Intra-abdominal Infections
- Gonorrhoea
- Meningitis
- Gynaecological infections
- Bone & Joint infections

# PRODUCT RANGE

## Meroni-CS - 500mg / 1gm

### Meropenem Injection I.P.

- Highly active against Gram Positive, Gram Negative as well as anaerobic organisms
- Highly resistant to degradation by beta-lactamases or cephalosporinases
- Penetrates well into many tissues and body fluids
- Exhibits superior potency over imipenem against Enterobacteriaceae isolates, especially Proteus mirabilis

## MERONICS-S

### Meropenem & Sulbactam for Injection

- Highly active against Gram Positive, Gram Negative as well as anaerobic organisms
- Highly resistant to degradation by beta-lactamases or cephalosporinases
- Penetrates well into many tissues and body fluids
- Exhibits superior potency over imipenem against Enterobacteriaceae isolates, especially Proteus mirabilis

## DORINAX-500

### Doripenem for Injection

- Has broad-Spectrum activity against aerobic Gram-negative and Gram-Positive and anaerobic pathogens
- Is an ideal antibiotic for treatment of serious nosocomial infections and severe sepsis for its exceptionally high efficiency and broad antibacterial spectrum of action
- Is a valuable and well-tolerated than imperial antimicrobial agents for complicated intra-abdominal infections, complicated urinary tract infection, acute biliary tract infection and nosocomial pneumonia treatment.

## DOXYNICS

### Doxycycline for Injection USP & Vitamin C Injection IP

- Imparts high potency due to complete absorption & longer plasma life
- Depicts least alteration of intestinal flora & thus low incidence of diarrhoea
- Safe with no renal toxicity

# PRODUCT RANGE

## CLARNAX-500MG

### Clarithromycin for Injection BP

- Better tolerated than amoxicillin/Clavulanate with a lower incidence of gastrointestinal side effects in the treatment of acute otitis media in children
- Exhibits 96.5% cure rate and is better tolerated than erythromycin in the treatment of streptococcal pharyngitis
- Results in marked reduction in cytokine levels and exhibits anti-inflammatory effect this beneficial in cystic fibrosis lung disease
- Modulate IL-8 levels and neutrophil accumulation thereby reduces neutrophils inflammation, in asthma

## Tigenax - 50mg

### Tigecycline 50mg Injection

- The only Glycylcycline antibiotic
- Minimum resistance
- Never seen before MOA
- Only viable option for NDM-1\*

## COLINAX - 3MIU

### Colistinmethate sodium 1, 2, 3, 4, 5 Million I.U. Injection

Specific Targeted Approach

- The most frequently encountered MDR organisms-ESKAPE'
- Enterococcus faecium\* Staph Aureus\* Klebsiella Pneumoniae
- Acinetobacterbaumanniil \*PseudomonasAeruginosa\* Enterobacterspp
- High clinical response and microbiological clearance Colistin decreases sputum levels in pulmonary infection
- Most of the studies suggest that neurotoxicity is rare, nephrotoxicity is reversible and less frequent.

## CLINAX

### Clindamycin Phosphate Injection I.P.

Clindamycin injection is used to treat certain types of bacterial infections, including infections of the lungs, skin, blood, bones, joints, female reproductive organs, and internal organs. Clindamycin is in a class of medications called lincomycin antibiotics. It works by slowing or stopping the growth of bacteria. Clindamycin injection is also sometimes used to prevent infection in people who are having certain types of surgery.

Clindamycin injection is also sometimes used to treat anthrax (a serious infection that may be spread as part of a bioterror attack) and toxoplasmosis. Clindamycin injection is also used in some pregnant women to prevent passing an infection to the baby during birth

# PRODUCT RANGE

## TERISIN-10ml

### Terlipressin Injection

- Superior over octreotide 4.5 time greater magnitude of hypotensive effect.
- Significantly improve renal function in HRS patients.
- Acute Variceal Bleeding.
- Abdominal & Pelvic Surgery.
- Hepato-renal Syndrome.

## OCTANAX - 50/100 MCG

### Octreotide Acetate Injection

- Secretory diarrhea due to carcinoid tumor
- Diarrhea due to vagotomy
- Diarrhea caused by short bowel syndrome or AIDS
- Octreotide has been used in low doses to stimulate small bowel motility in patients with small bowel bacterial overgrowth or intestinal pseudoobstruction secondary to scleroderma.

## LAVINAX

### Heprain Sodium Injection IP 25000 IU

- Converts harmful toxic ammonia into non-toxic urea, which is eliminated via Urine.
- Improve psychometric function in patients with hepatic encephalopathy
- Serve as a stimulus for hepatic glutamine synthesis which may be defective in acute and chronic liver disease.

## TRANICS - 5ml

### Tranexamic Acid 5ml

- Haemorrhage caused by general or local fibrinolysis such as:
- Menorrhagia and metrorrhagia
- Gastrointestinal bleeding
- Haemorrhagic urinary disorders, further to prostate surgery or surgical procedures affecting the urinary tract.
- Ear Nose Throat surgery (adenoidectomy, tonsillectomy, dental extractions)
- Gynaecological surgery or disorders of obstetric origin.
- Thoracic and abdominal surgery and other major surgical intervention such as cardiovascular surgery

# PRODUCT RANGE

## CERONICS-60

Cerebroprotein Hydrolysate For Injection 60mg

- Cerebroprotein is a short Peptide
- Protects against Isechemia Neurons Lesions
- Reduces Exotoxic Damage
- Promotes recovery or Regene Ration nervous system
- Exhibits Neurosciences & Neuroscience actions

## RABINAX-20

Rabeprazole Sodium for Injection I.P.

Rabeprazole is used to treat the symptoms of gastroesophageal reflux disease (GERD). A condition in which backward flow of acid from the stomach causes heartburn and possible injury of the esophagus (the tube that connects the throat and stomach) in adults and children 12 year of age and old

## ONDANICS 2ml, 4ml

Ondansetron Injection IP

Post Surgery | Drugs | Diarrhoea | Gastro-enteritis

- Acts both centrally and peripherally.
- Blocks works at the smell bowel, vagus nerve and chemoreceptor trigger zone.
- Provides decreased stimulation of the medullary vomiting center.
- Used in severe hyperemesis gravidarum to avoid Parenteral nutrition
- Significantly decreased nausea and emesis scores over 24h postoperatively without causing sedation.
- Used intemitlely in every trimster with no apparent adverse effects on mother or infant.

## AXVIR - 500mg

Acyclovir 500mg Injection

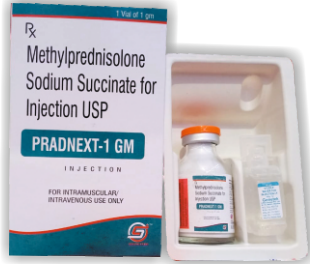

- Herpes encephalitis
- Traumatic herpes infections
- Herpes simplex meningitis
- Genital herpes
- Ecsema herpeticum

# PRODUCT RANGE

## PRADNEXT-1GM

**Methylprednisolone Sodium Succinate**  
1000mg / 500mg / 125mg / 40mg for Injection USP

- If ensures better anti-inflammatory potency than Hydrocortisone
- Offer faster onset of action than Dexamethasone
- More potent & more selective than Prednisone
- Potentiates action of bronchodilators with improvement in air flow parameters
- Effective for both "Acute Periods" & Long term Management of autoimmune diseases like : SLE (Systemic Lupus Eryhamatosus)

## DOPANICS

**Dopamine Hydrochloride Injection IP 40mg/ml**

- Produces positive chronotropic & inotropic effects on the myocardium
- Increases heart rate & heart contractility
- Acts within 6 minutes of IV administration
- Corrects hemodynamic imbalances present in shock syndrome

## DOBUNICS

**Dobutamine Hydrochloride Injection IP**

- Direct Acting Inotrop with Faster Action
- Congestive Heart failure
- Cardiac decompensation
- Inotropic support followed by surgical procedure

## Lebinax -4ml

**Labetalol Hydrochloride 200mg  
Tablet / Injection**

- Treatment of choice in arterial hypertension in pregnancy and puerperium
- Effective control of blood pressure, especially in patients with associated risk factors
- It does not produce sudden hypotension and does not reduce the uterus-placental flow avoiding adverse effects
- Ampoules and tablets for the best dosage flexibility

# PRODUCT RANGE

## LEVONITE - 5ml

### Levocarnitine Injection USP

Levocarnitine is used to prevent and treat a lack of carnitine. It is used to prevent and treat this condition in patients with kidney disease on dialysis. It is given to people whose body cannot properly use carnitine from their diet. Lack of carnitine can lead to liver, heart, and muscle problems

## GluNox-600

### Glutathione for Injection & Vitamin C Injection IP

- Fights Oxidants Stress in the Body by reducing reactive oxygen Species (ROS) and Oxidative stress in the body Nourishes skin
- Control Inflammation by Inhibiting the production of most Inflammation by inhibiting the production of most Inflammatory cytokines
- Is the best Anti-Aging
- Prevents Depression and Stress
- Limits neurodegeneration

## SUCRO-NICS - 5ml.

### Iron Sucrose Injection USP

- Contains non-ionic ferric iron and polymaltose in a stable complex
- Facilitates a controlled absorption of the ferric iron when it comes in contact with the mucosal cell surface
- Helps in avoiding the gastrointestinal irritation that is common with iron salts
- Facilitates once a day dosing
- Produces increased compliance and Prevents megaloblastic anaemia in pregnancy
- Prevents neural tube defects

## LAVICETAM

### Levetiracetam Injection U.S.P.

- Safe, broad-spectrum anticonvulsant drug with highly beneficial pharmacokinetic properties.
- Approved by the FDA as add-on-therapy for the treatment of partial seizures with or without secondary generalisation in adults
- Reduces the frequency of seizures in patients with refractory partial onset seizures to a significantly greater extent than placebo

# PRODUCT RANGE

## CS-COT-100

### Hydrocortisone 100/200mg Injection

- Useful to treat conditions resulting from over activity of the B-cell-mediated antibody response like inflammatory and rheumatoid diseases, as well as allergies
- Effective in place of prednisolone in patients needing steroid treatment but unable take oral medication, and preoperatively in patients on long-term steroid treatment to prevent Addisonian crises.
- Can be injected in inflamed joints resulting from diseases such as gout.

## MUCONICS 2ml / 5ml

### Acetylcysteine Injection BP

- Depolymerises mucoproteins
- Splits disulfide linkages
- Decreases mucus viscosity
- Enhances mucociliary clearance
- Facilitates easy expectoration

## PARANAX - IV 100ml

### Paracetamol Infusion IP (1.0%w/v)

Pain relief properties | Most widely acceptance  
A time tested anti pyretic & analgesia.

- **INDICATIONS:**
- Viral infections
- Aches & Pains
- Fever & Headache

## Polymak-B

### Polymyxin B for Injection USP

- Highly active against almost all gram-negative bacteria.
- Also binds and inactivates antitoxins.
- Binds to the cell membrane and alter its structure making it more permeable resulting in water uptake & cell death.
- Has a relatively low risk of microbial resistance.
- Highly effective for multi drug resistant bacteria.

# PRODUCT RANGE

## VALPO-CS

### Sodium Valproate Injection IP

- Valproate sodium injection is used to treat certain types of seizures (epilepsy), Valproate sodium is an anticonvulsant that works in the brain tissue to stop seizures.
- Valproate sodium is to be given only by or under the direct supervision of your doctor

## CS-COLIN

### Citicoline Sodium Injection IP

Citicoline is taken by mouth or given as an injection to help memory loss due to aging, improve vision in people with glaucoma, and help with recovery in stroke patients. It is also used for Alzheimer disease, Parkinson disease, bipolar disorder, lazy eye, and other conditions of the brain.

## Cefunax - 1.5

### Cefuroxime 1.5 Injection

Highly active beta lactamase producing strains which are resistant to ampicillin

- Respiratory Tract Infections
- Gastro Intestinal Infection
- Hospital Acquired Infections
- Urinary Tract Infection

## CS-MINE

### Thiamine Hydrochloride Injection IP

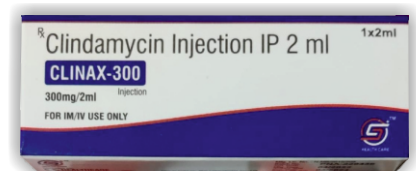

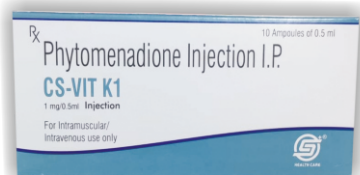

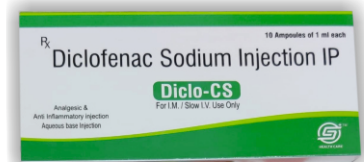

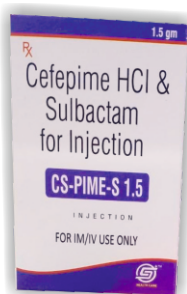

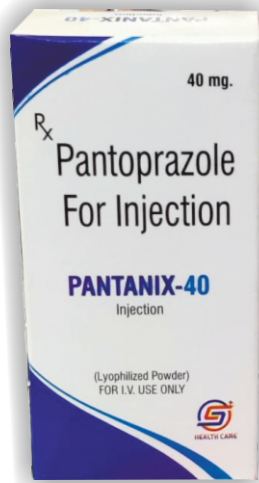

- Helps in Optic Neuripathy
- Beriberi

#### **Indications:**

- General Weakness
- Diabetic Neuropathy
- Peripheral Neuropathy
- B-Complex Deficiency
